

I am listener of K-LOVE radio and firmly believe it is a service provided that is within the public interest of my community. It is a great service to me and my family as it is a positive alternative to music that I can play in the car, with my 3 year old. It always seems to play the right song at the right time, just when I need it most. It is a true blessing to me and my family on a daily basis. I am not really sure how I could live without it. As a resident of this community, it provides information about events going on in our area that have been a blessing to me. It also allows a unity among believers in this community, which is a blessing in this day and age. It is very much in the public interest of this community because it allows us to connect, encourage and support one another. The programming K-LOVE provides is amazing and truly incredible. It would be sad if it was replaced by other programming that was not making a positive impact on society and our local community. Thank you for your time and consideration. God Bless You, Jill Bailey
